INON UCL-100LD/UCL-100M67 Compatibility Chart

This chart shows compatible camera/housing, necessary Mount Base/Lens Adapter Base (if any) and usability of add on close-up lens. Before using this product, make sure that your camera/housing is compatible and which accessory is required to use the lens.

Glossary : Mount 「28LD」 ·· Compatible with 「UCL-100LD」.
「M67」 ·· Compatible with 「UCL-100M67」.

Compatibility : ✓: Compatible — : Not compatible

Add on : ✓: Add-on M67 Mount series close-up lens on either of 「UCL-100LD」 or 「UCL-100M67」 is usable.
—: Add-on lens is not usable.

	Ai AF Micro-Nikkor 200mm f/4D IF-ED	--	-- *9	— *5	—	—	—

*1 Using UCL-100LD/M67 standalone on land will have vignetting at zoom wide end. Crop an image or zoom towards telephoto side.

*2 Using UCL-100LD/M67 standalone underwater will have slight vignetting at zoom wide end. Crop an image or zoom towards telephoto end little bit.

*3 Using UCL-100M67 standalone underwater will have vignetting at zoom wide end. You can avoid this by setting zoom position at 28mm (35mm film equivalent) which can be obtained when selecting [PTWC-01] in "Accessory" of the camera menu etc.

*4 When shooting at zoom wide side on land/underwater, housing lens ring could be recorded as red ghost in particular situation like backlit. You can avoid this by zooming in.

*5 Not compatible as the distance between UCL-100LD/M67 and master lens of the camera is too long beyond limitation causing degradation on edges of an image.

*6 Compatible only when Olympus[M.ZUIKO DIGITAL 14-42mm F3.5-5.6 II R] or [M.ZUIKO DIGITAL 14-42mm F3.5-5.6 II] is being used.

*7 Compatible only when Olympus[M.ZUIKO DIGITAL 14-42mm F3.5-5.6 II R] and its dedicated [Front Port Flat 5] is being used.

*8 Compatible only when Nikon[1NIKKOR VR 10-30mm f/3.5-5.6] is being used.

*9 When the lens is housed in a port/housing which allows to hold either UCL-100LD or UCL-100M67 physically.

*10 Compatible only when Panasonic[14-42mm/F3.5-5.6 II] and its dedicated [MRS 14-42 II Port] is being used.

*11 Compatible only when Nikon[1 NIKKOR 11-27.5mm f/3.5-5.6] is being used.

*12 Compatible only when Olympus[M.ZUIKO DIGITAL ED 14-42mm F3.5-5.6EZ] is being used.

*13 Camera's Microscope Mode lets you get extreme close-ups
